HELP KEEP ANTIBIOTICS WORKING

- Antibiotic resistance causes antibiotics to stop working and is a serious threat to everyone's health.
- Only take antibiotics if they are prescribed for you. Do not save or share antibiotics.
- Bring unused antibiotics back to the pharmacy for safe disposal.
- Antibiotics that get into the environment may drive bacteria to become more resistant.

To learn more, talk to your pharmacy team or see www.health.govt.nz/antibioticresistance
